🪪 Profile

As an experienced Software Engineer with a focus on front-end development using ReactJS and React Native, I have a proven track record of delivering scalable solutions for complex business challenges. With expertise in UI implementation, API integration, user authentication, and global state management, I am passionate about creating seamless user experiences. Throughout my career, I have successfully contributed to the development and release of applications on various platforms, including PlayStore, AppStore, and AppGallery.

💼 Professional Experience

PT. Populix Informasi Teknologi   11/2022 – present
Sr. Front-End Engineer   Jakarta, Indonesia
Populix is a platform and insight provider connecting businesses with respondents to facilitate better business decisions and solutions. As a Senior Front-End at Populix, I contributed to the following key features:
- Implemented CI/CD integration to streamline mobile testing and release processes.
- Integrated marketing tools and analytics into mobile apps (AppsFlyer, Amplitude & MoEngage).
- Collaborated closely with Engineer Manager, Tech Lead, Product, and stakeholders in feature development.
- Created or reviewed documents and code.
- Addressed bug fixes, made improvements, and conducted refactoring.

PT. Modal Rakyat Indonesia   04/2019 – 05/2022
Lead Software Engineer   Jakarta, Indonesia
As a Software Engineer at Modal Rakyat, I played a key role in developing an Indonesian Peer-To-Peer lending app for MSMEs. Highlights include:
- Led UI implementation for a seamless user experience.
- Collaborated on effective integration with APIs and Back End systems.
- Engineered secure user authentication features.
- Implemented efficient global data handling.
- Addressed bugs and improved the app based on user feedback.
- Successfully launched on multiple platforms.
- Promoted to Tech Lead Mobile Developer, I continued to enhance the app, resulting in a polished release version 1.0.0. Throughout my three-year tenure, I consistently elevated the app's capabilities and user satisfaction

PT. Hartono Mandiri Makmur - Freelance (Warunggaib)   02/2020 - 01/2021

Mobile Developer   Jakarta, Indonesia

Warunggaib is an Indonesian online marketplace specializing in unique
antique and traditional items. Here are some features that I have worked
on in the application development.
- Implementation of designs into the application
- API integration with the Back-End Team
- User Authentication (Email, Google, Apple & FB)
- Global state management
- User transactions Seller & Buyer
- Release to PlayStore & AppStore

PT. Eklanku Indonesia Cemerlang - Freelance (Otuchat)   09/2019 - 01/2020

Mobile Developer   Jakarta, Indonesia

Otuchat is a messenger application with additional features such as TopUp
Pulsa and Paket Data, Voucher Games, and Listrik. Here are some features
I worked on:
- Implemented internet connection handler for Android apps.
- Addressed bug fixes, made improvements, and conducted application
  refactoring.
- Integrated UI and API for product listings
